SMOOTH ZERO TREATMENT

Smooth Zero Treatment provides maximum amount of curl reduction vs other non-formaldehyde smoothing treatments. Smooth Zero delivers amazing shine, humidity protection and “frizz-free” smoothing for all types of hair. Smooth Zero provides long-lasting nourishment and smoothing for up to 3 months. Vegan formula! Contains no animal derived ingredients and is sulfate, paraben, and cruelty free.

BEFORE YOU START

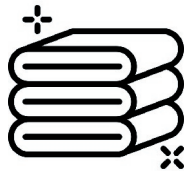

- Always perform a client consultation.
- Follow instructions.
- Shake bottle well
- Do not overuse product.
- Never use on pregnant/nursing client.
- Never use on person under the age of 12 years.

1 / CLEANSE:

Gently cleanse the hair with Keratin Republic Clarifying Shampoo. Work shampoo into a lather from roots to ends of the hair, being sure not to massage or scratch the scalp.

Rinse well, then towel dry and detangle with wide tooth comb.

Towel Dry the hair to remove excess water.

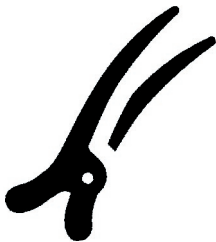

2 / BLOW DRY:

Using a paddle or thermal brush on medium heat blow dry the hair until 75% dry.

3 / DIVIDE:

Section the hair into 3-4 large parts.

4 / MEASURE:

Determine estimated amount of KERATIN REPUBLIC SMOOTH ZERO treatment needed based on length/density of hair:

- Short Hair - 1/2 oz
- Medium Hair - 1/2 to 3/4 oz
- Long Hair - 3/4 to 1oz

5 / APPLICATION:

Wearing gloves and using an applicator brush, take 1/4" to 1/2" sections and begin each section by dabbing the treatment 1/4" from the scalp, then repeating every 1" to 1 1/2" until you reach the ends.

Massage the treatment into each section, then comb through with a fine tooth comb away from the face to remove excess.

Do not over-saturate the hair and do not apply to the scalp or skin.

6 / PROCESS:

Process treatment for **30-45 minutes** with no heat or cap. **NOTE:** For resistant, coarse or unruly hair types, process **45 minutes**.

7 / RINSE:

After processing , rinse the hair with water for 10 to 20 seconds to remove excess treatment.

A small amount of the treatment must be left in the hair for best results.

Do not shampoo the hair.

8 / BLOW DRY:

On medium heat, blow dry the hair straight and smooth with a paddle or thermal brush, using tension until **100% dry**

9 / FLAT IRONING:

Start at nape of neck and take 1/4" to 1/2" sections of hair and iron each section thoroughly from roots to ends until smooth and shiny. Adjust iron temperature between **400°F–450°F** Adjust temperature depending on the health and/or resistance of the hair. A test strand is recommended.

Always iron away from the face. Continue this process until all the hair is thoroughly ironed.

Hair Type	Iron Setting
Coarse or resistant texture, virgin or extra curly	430 - 450 F
Medium Texture or color treated	410 - 420 F
Fine texture, double processed or high-lighted	400 F
